

4 Courses

Introduction to UI Design

User Research and Design

Prototyping and Design

Evaluating User Interfaces

Nov 6, 2026

Hamza Rashid K

has successfully completed the online Specialization

User Interface Design

You learned industry-standard theory and methods for developing successful user interfaces. You now have fluency with the user research, prototyping and evaluation techniques necessary for creating intuitive interfaces that facilitate good user experiences. You demonstrated this fluency through an in-depth capstone project. Concepts and techniques covered include structured approaches for understanding a user base and their needs (e.g. contextual inquiry and design psychology), prototyping and design methods (e.g. low-fidelity and paper prototyping), and techniques for evaluating your design choices (e.g. heuristic evaluation, user studies).

Haiyi Zhu
Assistant Professor
Carnegie Mellon University

Svetlana Yarosh, Ph.D.
Associate Professor
Computer Science & Engineering

Loren Terveen
Professor
Computer Science and Engineering

Joseph A. Konstan
Distinguished McKnight Professor
Distinguished University Teaching Professor
Department of Computer Science and Engineering
University of Minnesota

Dr. Brent Hecht
Department of Computer Science and Engineering
University of Minnesota

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
